EXPERIENCE

AI Applied Engineer

Independent Contractor

2025-Present Remote

- Created, managed, & maintained fully custom AI features & agents for small businesses & nonprofit organizations, serving 1,000s of people daily: customer service FAQs, inbox management, calendar organization, social media posting & analytics, customer review replies, identify sales leads, draft sales pitches, & measure employee satisfaction
- Agents are default human approval required; implemented a self-improvement loop that develops context & updates evals to allow agent more self-sufficiency. Users interact with web dashboard to pick various models, define tools with schemas, handle multi-step tool calling loops, approve/deny evals, & scope context & memory management

Typescript bash Hermes n8n Claude GPT Gemini DeepSeek Model API Clients MCPs

Backend Software Engineer

HashiCorp, an IBM Company

2025 Remote

- **Cloud Enterprise Identity Team:** Implemented SCIM between eIPDs & HCP for uniform identity access & management for key clients, overall impacting millions of users
- Designed, prototyped, & implemented group functionality & group membership features while ensuring stability & usability. Project was released 2 weeks ahead of projected timeline for Private Beta with 100% satisfaction in customer testing

Go River Queue Postgres

Full Stack Software Engineer

Stride Consulting

2022-2023 Remote

- **MoveHQ:** Delivered 12-17 features in 2 months, slashed errors in testing by 60% & increased test coverage to 95% & rectified 5,000+ tests. Introduced a notification bus from scratch. **Wunderkind:** Implemented greenfield auth protocols, unified graphics, & refined testing procedures
- In 3 months, won Stridee award for building working relationships for the best they can be, created first ever official matching fund, & increased connection across remote employees
